

**Press release**

**UNIWELD Maschinenbau GmbH & Co. KG**

*a merger of specialised companies in the welding business.*

In 1999 UNIWELD Maschinenbau GmbH & Co. KG with its headquarters in Burbach emerged as the result of the year-long intensive co-operative partnership between the traditional companies Stähler Maschinenfabrik, Kröger Schweißtechnik and Protarc-Zaar.

Thanks to the merger of specialised companies, the extensive know-how in all areas of welding manufacturing processes is consolidated under one roof. The complete range covers special machines for welding engineering, plants and tools for submerged arc welding, standard welding equipment, automation and handling, handling systems for testing equipment and general mechanical engineering.

By exploiting the effects of synergy in development, production and service, automated solutions for economical and rational production processes even for complicated and unusual tasks can be analysed, planned, manufactured and assembled. A far-reaching 24-hour customer service guarantees the high availability of the production lines. Customers include car manufacturers, supporting industry, manufacturers of heating boilers, pipeline constructors and shipyards, across the whole spectrum of the metal-working industry.

Plants built by UNIWELD Maschinenbau can be found both within and outside Europe.

UNIWELD Maschinenbau makes economical production of high-quality end products in the metal-working industry possible thanks to the automation of production processes.
